Fishes - Texas Marine Species Identification

Fish do not represent a monophyletic group, and therefore the "evolution of fish" is not studied as a single event. Early fish from the fossil record are represented by a group of small, jawless, armored fish known as ostracoderms.

Below are links to the free, downloadable Word Doc and PDF versions of the latest edition (2014) of the Guidelines for the Use of Fishes in Research.

Guidelines for the Use of Fishes in Research | American

Healthy marine species like whales, sea turtles, coral, and salmon are important for maintaining balanced and thriving ocean ecosystems. We work to prevent marine species populations from decline and extinction, protect them from human activities, and monitor activities that might impact them so they are around for future generations.
