Let's say that I'm working at a restaurant and I'm making 10 dollars per hour. But on top of my hourly wage I also get tips each hour. So this entire expression you can do this as how much i might make in a given hour.

What is a variable? (video) | Khan Academy

In microeconomics, supply and demand is an economic model of price determination in a market. It postulates that, holding all else equal, in a competitive market, the unit price for a particular good, or other traded item such as labor or liquid financial assets, will vary until it settles at a point where the quantity demanded (at the current ...
