Multiagent Systems: Algorithmic, Game-Theoretic, and

The game of chicken, also known as the hawk–dove game or snowdrift game, is a model of conflict for two players in game theory. The principle of the game is that while it is to both players's benefit if one player yields, the other player's optimal choice depends on what their opponent is doing: if the player opponent yields, they should not ...

Chicken (game) - Wikipedia

Game theory is the study of the ways in which interacting choices of economic agents produce outcomes with respect to the preferences (or utilities) of those agents, where the outcomes in question might have been intended by none of the agents.

Game Theory (Stanford Encyclopedia of Philosophy)

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Foreign Policy Analysis and Rational Choice Models

This book presents a unified treatment of many different kinds of planning algorithms. The subject lies at the crossroads between robotics, control theory, artificial intelligence, algorithms, and computer graphics.

REQUIREMENTS FOR A MAJOR IN MATHEMATICS. Mathematics is the study of quantity, structure and space. While mathematics is important in understanding and influencing the physical world around us, mathematics can also be curiosity-driven and enjoyed without the requirement of a particular application.

BibMe: Free Bibliography & Citation Maker - MLA, APA

For years, researchers and practitioners have primarily investigated the various processes within manufacturing supply chains individually. Recently, however, there has been increasing attention placed on the performance, design, and analysis of the supply chain as a whole.

Supply chain design and analysis:: Models and methods

Undergraduate Major in Computer Game Science. The Computer Game Science major gives students a strong foundation in introductory information and computer science, an extensive education in technologies and design practices associated with computer games, and an opportunity to focus in two areas of particular interest to the student.
