Probability is the branch of mathematics that studies the possible outcomes of given events together with the outcomes' relative likelihoods and distributions. In common usage, the word "probability" is used to mean the chance that a particular event (or set of events) will occur expressed on a linear scale from 0 (impossibility) to 1 ...

Introduction. A probability space is a mathematical triplet  $(\Omega, \mathcal{F}, P)$  that presents a model for a particular class of real-world situations. As with other models, its author ultimately defines which elements  $\omega \in \Omega$ , and will contain.
